THE BASICS

GENTLY DETACH THE PRE-CUT PIECES

FOLD

- VALLEY FOLD / PLIAGE EN VALLÉE
- MOUNTAIN FOLD / PLIAGE EN MONTAGNE

Watch folding tutorial video

FIND MATCHING POINTS AND GLUE TOGETHER

Important!
Always apply glue on the flaps on the side where there is no text

TEST SAMPLE

Before to start the sculpture try the little House TEST. We recommend it for people who have never done a papercraft. This will allow you to practice and avoid some sticking mistakes. Find inside the kit the House Test sheet.

Detach and manipulate gently the different parts.

We recommend to start with this method:

- 1/ Apply all folds
- 2/ Assemble Numbers in order (1, 2, 3, and 4) by using a glue (white wood glue type). Press firmly on the assembly area for a few seconds so that the glue has set firmly on the paper.

Would you please do me a favour?

Say a few words about your experience with the sculpture!
Your review will help fellow papercrafters know what to expect, which will help me a lot.

Here are some ideas to help you:

- * What advice would you give to a beginner?
- * Was it your first sculpture? Are you a serial paper crafter?
- * Was the process easier than you thought?
- * What is your opinion about the template? The instructions?
- * If you had to compare with previous sculptures you made, what would you say? * Are you proud of yourself? (you can be!)
- * Did it give the taste for starting a new one?
- * Who (or what room) did you make it for? etc.
